— 产品特点 —

Features

公司注重科研投入，与沈阳变压器研究所、湖南大学、上海煤炭研究所等高校、科研单位密切合作，研发出新型矿用隔爆型移动变电站。移动变电站箱体采用4mm以上钢板制成，具有优良的隔爆性能，变压器线圈采用NOMEX绝缘材料经VPI真空压力浸漆，增强耐潮性能，局部放电量小。铁心采用优质高导磁率冷轧硅钢片，多级步进式全斜接缝，上、下铁轭用拉带紧固，结构先进、紧凑、可靠。本产品具有机械强度高、抗短路能力强、承受热冲击能力强、难燃、防火性能高、不产生有害气体、噪声低、绝缘性能好、节能、过载能力强、维护简便等特点，适合于煤矿井下使用。

Company pays attention to scientific research, and Shenyang Transformer Research Institute, Hunan University, Shanghai University Coal Research Institute, in close cooperation with research institutes, developed a new mobile substation explosion proof. Mobile substation steel box made by more than 4mm, with flameproof excellent performance, transformer coil insulation material by using NOMEX VPI Vacuum Pressure Impregnation, resistant to moisture enhanced the performance of a small amount of partial discharge. Core of high quality cold-rolled silicon steel permeability, multi-level step-wide oblique joints, upper and lower pull belt fastened with iron yoke, advanced structure, compact and reliable. This product has high mechanical strength, resistance to short-circuit ability to withstand thermal shock capability, flame, high fire resistance, does not produce harmful gases, low noise, good insulation, energy saving, strong overload Yong, easy to maintain and is suitable to underground coal mine use.

订货须知 Trade Notice

选用我厂产品时，请提供下列数据，以便更好地为您服务；

Please supply the following data when choose our products, So that we can supply finer serve

- 变压器型号 type of transformer
- 额定容量 Rated Capacity
- 相数与频率 Phase and frequency
- 额定电压 Rated voltage
- 使用条件 Conditions of Use
- 出线电缆外径 Cable outer diameter outlet
- 轨距或安装尺寸 Gauge or install size
- 开关要求 Switch requirements
- 其他要求 Other Requirements

Mining Flameproof movable substation and Dry -Type Transformer

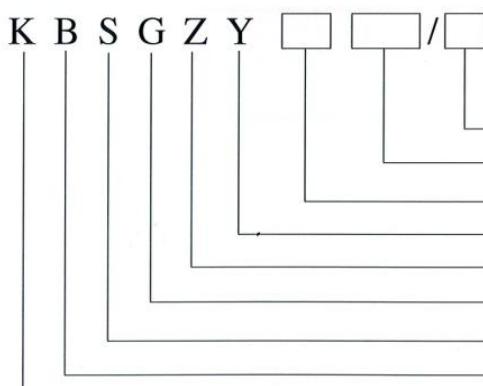

使用环境条件

- 1、海拔不超过4000m;
 - 2、环境温度：最高气温40℃； 最高日平均气温30℃
最高年平均气温20℃ 最低气温-5℃
 - 3、空气相对湿度不超过95% (25℃时)
 - 4、在有甲烷混合气体和煤尘，且有爆炸危险的矿井中；
 - 5、无强烈颠簸、震动和与垂直面的倾斜度不超过15° 的环境
 - 6、无腐蚀金属和破坏绝缘的气体与蒸汽；
 - 7、无滴水的地方
 - 8、电源的波形近似于正弦波；
 - 9、三相电源电压近似对称。
- 注：超出本条件的规定时，请与本厂协商。

Using conditions

- 1、Sea level not higher than 4000m
 - 2、Ambient tempcrature:maximum temperature40℃
maximum average temperature in any one day30℃
maximum average temperature in any one year20℃
minimum temperature -5℃
 - 3、Atmosphere relative humidity not more than 95%(at 25℃)
 - 4、In the mines having methane gaseous and coal dust with danger of explosion
 - 5、In an environment without strong shaking and jolt, and the perpendicular slope not exceeding 15°
 - 6、No gas and steam corroding metal and immuring the insulation
 - 7、Place without water dropping.
 - 8、The shape of power supply wave is approximately sinusoidal
 - 9、Voltage of three-phase power supply is approximately symmetrical
- Attention: please consult with us when exceeding

型号及含义 Type and meaning

- 电压等级(kv) Voltage grade of H.V. side (KV)
- 额定容量(KVA) Rated capacity (kva)

- 移动变电站 Movable substation
- 组合式 Assembly
- 干式 Dry-type
- 三相 Three-phase
- 隔爆 Flameproof
- 矿用 Mining

产品特点 Feature

1、KBSGZY-50-3150/6-10移动变电站符合新GB8286-2005《矿用隔爆型移动变电站》要求。变压器6KV系列空载损耗比原标准平均降低14%，负载损耗平均降低9%，10KV系列空载损耗比原标准平均降低14%，负载损耗平均降低11%，空载电流、短路阻抗都有所下降。

KBSGZY-50-3150/6-10 mobile substation to meet the new GB8286-2005 "mobile substation explosion proof" requirement. 6KV series transformer load loss standard average lower than the original 14%, the average load loss reduction 9%; 10KV series of no-load loss average lower than the original standard of 14%; load loss average reduction of 11%, no load current, short circuit impedance are the decline.

2、矿用隔爆型移动变电站由干式变压器、高压负荷开关或高压真空开关和低压馈电开关或低压保护箱组成。开关的组合方式有高压负荷开关+低压馈电开关、高压真空开关+低压馈电开关、高压真空开关+低压保护箱。高压负荷开关与低压保护箱不能配套使用。

Flameproof mobile substation from the dry type transformers, high voltage switches or high-voltage vacuum switches and low voltage feed switch box or low voltage protection component. Switch combinations are high voltage switches + low voltage feed switch, high voltage vacuum switch + low voltage feed switch, high voltage vacuum switch + voltage protection box. High voltage switches and boxes can not be supporting the use of low-voltage protection.

3、相数、频率、冷却方式：3相、50Hz、ANAN；Phase, frequency and cooling method: 3-phase, 50Hz and ANAN

服务中国电力
HXElectricity

—— 矿用隔爆型移动负荷中心 ——

Mobil Load Center of Explosion Proof Type for Mine

该负荷中心把智能型高压真空配电装置、多路输出干式变压器、低压组合开关集成为一体，向井下多台设备直接供电，缩小了体积，节省了空间，降低了电缆故障率，同时有利于井下设备自动化控制和标准化管理。

This load center combines intellectual high voltage vacuum power distribution armament with dry type transformer of multi output and low voltage combination switch .It can directly provide electricity for several sets or facilities in mine so the space and area are reduced and saved at the same time the fault rate of cable is .cutdown and it is good for facilities to be auto controlled and get standard management.

参数如下

高压侧额定电压：6kV或10kV

低压侧额定电压：3450V、1200V、693V

额定频率：50Hz

高压侧开关：6kV或10kV智能型高压真空配电装置

低压侧组合开关：

组合方式：10路输出、8路供电、双速、2路照明（127V （不同电压任意组合）

真空交流接触器：3.6kV/400A、1.14kV/400A

保护方式：过流、短路、漏电闭锁、漏电保护、绝缘检测、过压、断相

智能化控制：可实现工作状态及故障显示及远程控制标准化接口，数字化传输信号、中英文菜单显示。

Parameters are as follows

High side rated voltage: 6kV or 10kV

Low side rated voltage: 3450V, 1200V, 693V

Rated frequency: 50Hz

High Side Switch: 6kV or 10kV high-voltage vacuum distribution equipment smart

Combination of low-voltage side switches;

Combinations: 10 output, 8 power supply, two-speed, 2-way lighting (127V) (any combination of different voltages)

Vacuum Contactors: 3.6kV/400A, 1.14kV/400A

Protection mode: current, short circuit,

Leakage latch, leakage protection, insulation testing, over-voltage, phase

Intelligent Control: can achieve working status and fault display and remote control of standardized interfaces, digital transmission signal, in English and Chinese menu display.
